Summary

BCA graduate with hands-on knowledge of DevOps and AWS Cloud, including Terraform, Docker, Jenkins, Kubernetes, Ansible, Git, and Linux. Skilled in infrastructure automation, server configuration, and Bash scripting, with practical experience in deploying and managing AWS resources. Looking for a DevOps Engineer role to contribute to cloud infrastructure and automation.

Projects

AWS Infrastructure Automation — Terraform

- Automated provisioning of the AWS EC2 infrastructure using Terraform, reducing manual server setup.
- Provisioned and configured EC2, Security Group and EC2 Key Pair for secure and controlled server access.
- Automated Nginx installation and web-server configuration on EC2 using a Bash script.
- Configured multiple ports through Terraform Security Group rules and used Terraform output to expose EC2 access details.

Server Configuration Automation — Ansible

- Automated configuration and package management across multiple Ubuntu servers using Ansible Playbooks.
- Managed remote servers through SSH-based inventory with privilege escalation using become.
- Automated installation of multiple packages using variables and loops in Ansible playbooks.

Containerization and Deployment — Docker & Kubernetes

- Created and managed Docker images using Dockerfiles and pushed them to Docker Hub.
- Deployed containerized applications on Kubernetes using Pods, Deployments, and Services.
- Exposed applications through NodePort and monitored Pod health using kubectl.
- Performed HTTP load testing to evaluate application performance.

Training

- **DevOps & AWS Trainee — Croma Campus** **2 June 2026 – 24 October 2026**
  Undergoing professional training in DevOps and Amazon Web Services (AWS), with hands-on experience in Linux, Git, Docker, Kubernetes, Ansible, CI/CD pipelines, and AWS cloud services. Gaining practical knowledge of containerization, application deployment, configuration management, cloud infrastructure, and automation through real-world projects.

Tech Stack

DevOps Tools: Jenkins, Terraform, Docker, Ansible, Kubernetes
Monitoring Tools: Grafana , Prometheus
Cloud: AWS
Operating System: Linux, Ubuntu, Windows

Education

Bachelor of Computer Application	8.11 CGPA
Chhatrapati Shahu Ji Maharaj University, Kanpur	2023 – 2026
Class 12th, Science	73.40%
Ram Sahay Inter College, Shivrajpur, Kanpur Nagar	2022 – 2023
Class 10th, Computer	63%
Ashoka Public School, Shivrajpur, Kanpur Nagar	2020 – 2021

Certifications

DevOps - Associate Training(Croma Campus)	Issued: October 2026
Credential ID CCN-84561123	11 August 2026 - 24 October 2026
AWS Solutions Architect – Associate Training(Croma Campus)	Issued: August 2026
Credential ID CCN-86154923	2 June 2026 - 3 August 2026
